

The information architecture defines the structure of the e-commerce website, organizing content into logical sections to help users easily find products, offers, and account options with minimal effort.

KEY TAKEAWAY

This structure ensures users can quickly navigate through categories, discover deals, manage their cart, and access account or support options efficiently.

FREE DELIVERY on all orders above ₹999 | Easy 7-day returns

Below are annotations that explain the purpose and functionality of each key section in the homepage wireframe.

1 Top Announcement Bar

Communicates key offers, free delivery and return policy to grab user attention instantly.

2 Header with Search & Actions

Provides brand identity, search functionality and quick access to login, wishlist and cart.

3 Navigation Bar

Allows users to quickly browse major product categories with one-click navigation.

4 Hero Banner

Highlights promotions and new arrivals with a strong headline and primary CTA to drive engagement.

5 Shop by Category

Displays popular categories with icons for quick browsing and easy product discovery.

6 Featured Products

Showcases key products with essential details to help users make quick purchasing decisions.

7 Promotional Banner

Encourages users to take advantage of limited time offers and increases conversions.

8 Why Choose Us

Builds trust and confidence by highlighting key service benefits and value propositions.

9 Newsletter Subscription

Encourages user retention by inviting visitors to subscribe for updates and exclusive offers.

10 Footer

Provides secondary navigation, important links and contact information to support users across the website.

This user flow illustrates the complete path a user takes from landing on the homepage to successfully placing an order on the e-commerce website.
